Turn-key Solutions

Water Sentry™

The Water Sentry is a large bulk water dispensing solution, with overhead load outs up to 4" diameter.

Eliminates ice build up where ambient temperatures drop below freezing.

Redundancy back flow prevention (Air Gap and Reduced Pressure).

Water General™

A cost effective solution great for curbside loading locations. Ideal for all weather climates.

Mini General™

The Mini General is an economical solution for low volume bulk water dispensing applications. Is well suited for all weather climates.

Hydrant General™

The Hydrant General is a portable bulk water dispensing station specifically designed to eliminate hydrant meters. Is best suited for warmer climates or seasonal use. Solar powered.

Water Giant™

The Water Giant is a powerful bulk water dispensing solution designed to simultaneously dispense bulk water to as many as four trucks with load outs up to 6" diameter.

Each turn-key solution is a pre-engineered, self contained, insulated and maintenance friendly dispensing station. All stations can be heated, cooled or both and come complete with a supply valve, reduced pressure backflow prevention device, stainless steel piping, meter, drain valve, access terminal and field terminal box.

PROVIDE SECURITY / GENERATE REVENUE / REDUCE ADMINISTRATION COST

System Administration Software

Water+™

The cornerstone of our Bulk Water Dispensing Stations Receiving Stations is the Windows based Water+™ System Administration Software. It is the tool you need to control, monitor and analyze your bulk water dispensing and allows you to centrally manage multiple stations.

What can Water+™ do for you?

Provide Security by Controlling:

Hours of operation

- You control when your station is open for business

Who is using your facility

- Verify authorized users (hauler and driver prior to dispensing water)

Generate Revenue:

\$\$\$ for bulk water dispensed

- Charge for quantity dispensed (potable, raw or reclaimed water)
- Charge a monthly connection fee for account administration

Reduce Administration Cost:

Account Management

- Set up customer account information (i.e. hauler and drivers.)
- Instant activation or deactivation of accounts
- Adjustable billing rates
- Automated billing
- Flexible Customer Payment Options (Account, Pre-pay or Credit Card)

Station Management

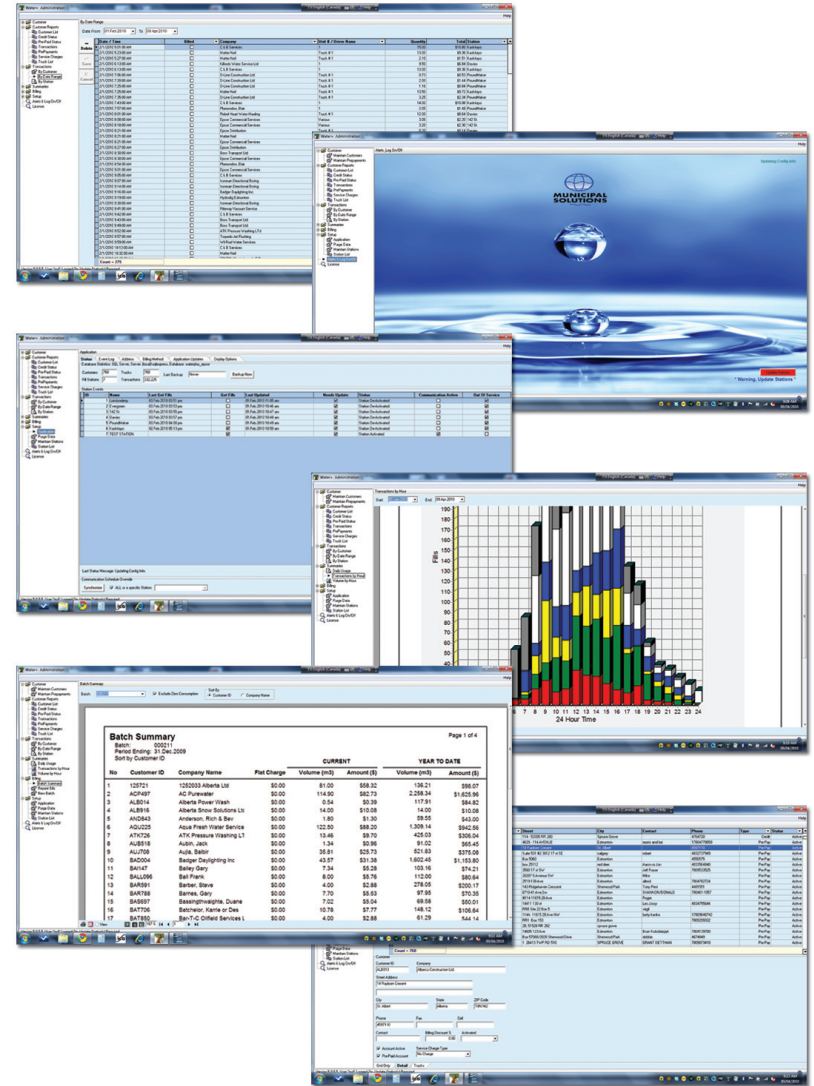

- Station option set up (i.e. flow meter pulse rate)
- Connectivity set up
- Keyless/cardless access (provide security without the administration of keys or cards)

System Management

- Historical/statistical reporting (by station, customer, quantity and quality)
- Easily interfaces to Municipal Accounting Software via ODBC, eliminating duplicate data entry

Communication Connectivity Options:

- Direct (Serial or Ethernet)
- Cellular Wireless (1X)
- Dial-up (Serial)
- Radio (Serial or Ethernet)
