

NOTICE TO OUR VALUABLE UNITED STATES CUSTOMERS, MAY 2009

BUY AMERICAN COMPLIANCE

Municipal Solutions has been the premier manufacturer of bulk water dispensing stations and septage receiving stations for the past 10 years.

With the recent economic downturn, billions of dollars are now being invested in infrastructure across America. It is the desire of the US Government to keep those dollars (to the extent possible) in the United States, and keep America working.

Our many clients wish to comply with the “Buy American” provisions in the recent stimulus funding. Municipal Solutions is committed to **manufacturing and assembling** using US Steel, US labor, and US components, for our United States customers whenever possible.

Municipal Solutions remains committed to quality and integrity.

We are proud to be “Made in the USA” and committed to supporting local businesses, municipalities, private and public utilities into the future.
