

BULK WATER DISPENSING

Water Sentry™

WS

The **Water Sentry™** is a large bulk water dispensing solution, with overhead load outs up to 4" diameter. These systems are typically used where ambient temperatures can drop below freezing.

The **Water Sentry™** is a completely self-contained turnkey system that will easily handle most bulk water dispensing requirements.

EACH SYSTEM INCLUDES:

Insulated Enclosure, Stainless Steel Piping, Backflow Preventor, Meter Valve or Flow Meter, Access Terminal, HVAC, Field Terminal Box, Meter Socket and Service Entrance Panel.

Data communication with the system can be via a variety of methods, including direct (serial or ethernet), dial-up modem, 1x cellular and radio. The **Water Sentry™** interfaces with **Water+™** System Administration Software.

OPERATION SEQUENCE:

1. Connect fill hose to water tank
2. Proceed to Access Terminal:
 - ☑ Input 3 Digit Customer Access # – Press "Enter"
 - ☑ Input 4 Digit Security Pin # – Press "Enter"
 - ☑ Customer account balance is displayed (for Pre-Paid Customers) – Press "Enter"
 - ☑ Input desired fill quantity – Press "Enter"
 - ☑ Press "Start"

Pumping stops when quantity is reached or "Stop" button is pressed. Each transaction is date and time stamped and recorded by **Water+™**
